**Aki jelszavakat akar óbégatni, azt zavarja a független média. Aki gondolkodni akar, nem élhet nélküle.** TÁMOGASS TE IS!

” Még ez év elején olyan jelzést kaptunk a német kábítószerellenes szolgálattól, hogy egy kábítószer ügy nyomára bukkantak, s találtak egy miskolci telefonszámot. Arra kértek minket, hogy próbáljuk lenyomozni ezt a szálat

- így kezdődött az a történet, amelyet Hollósi György őrnagy, az ORFK kábítószer bűnözés elleni alosztály munkatársa mesélt el 1992 decemberében az Új Hírnök nevű újságnak. Az ügy kezdeti szakaszában még a rendőrök sem gondolták volna, hogy a telefonszámon keresztül egy nemzetközi drogügyletre bukkannak, ahol az egyik legnagyobb magyar vállalat, a BorsodChem az érintett. Mint a kábítószer előállítója,

### ★ BEST OF MINDEKÖZBEN

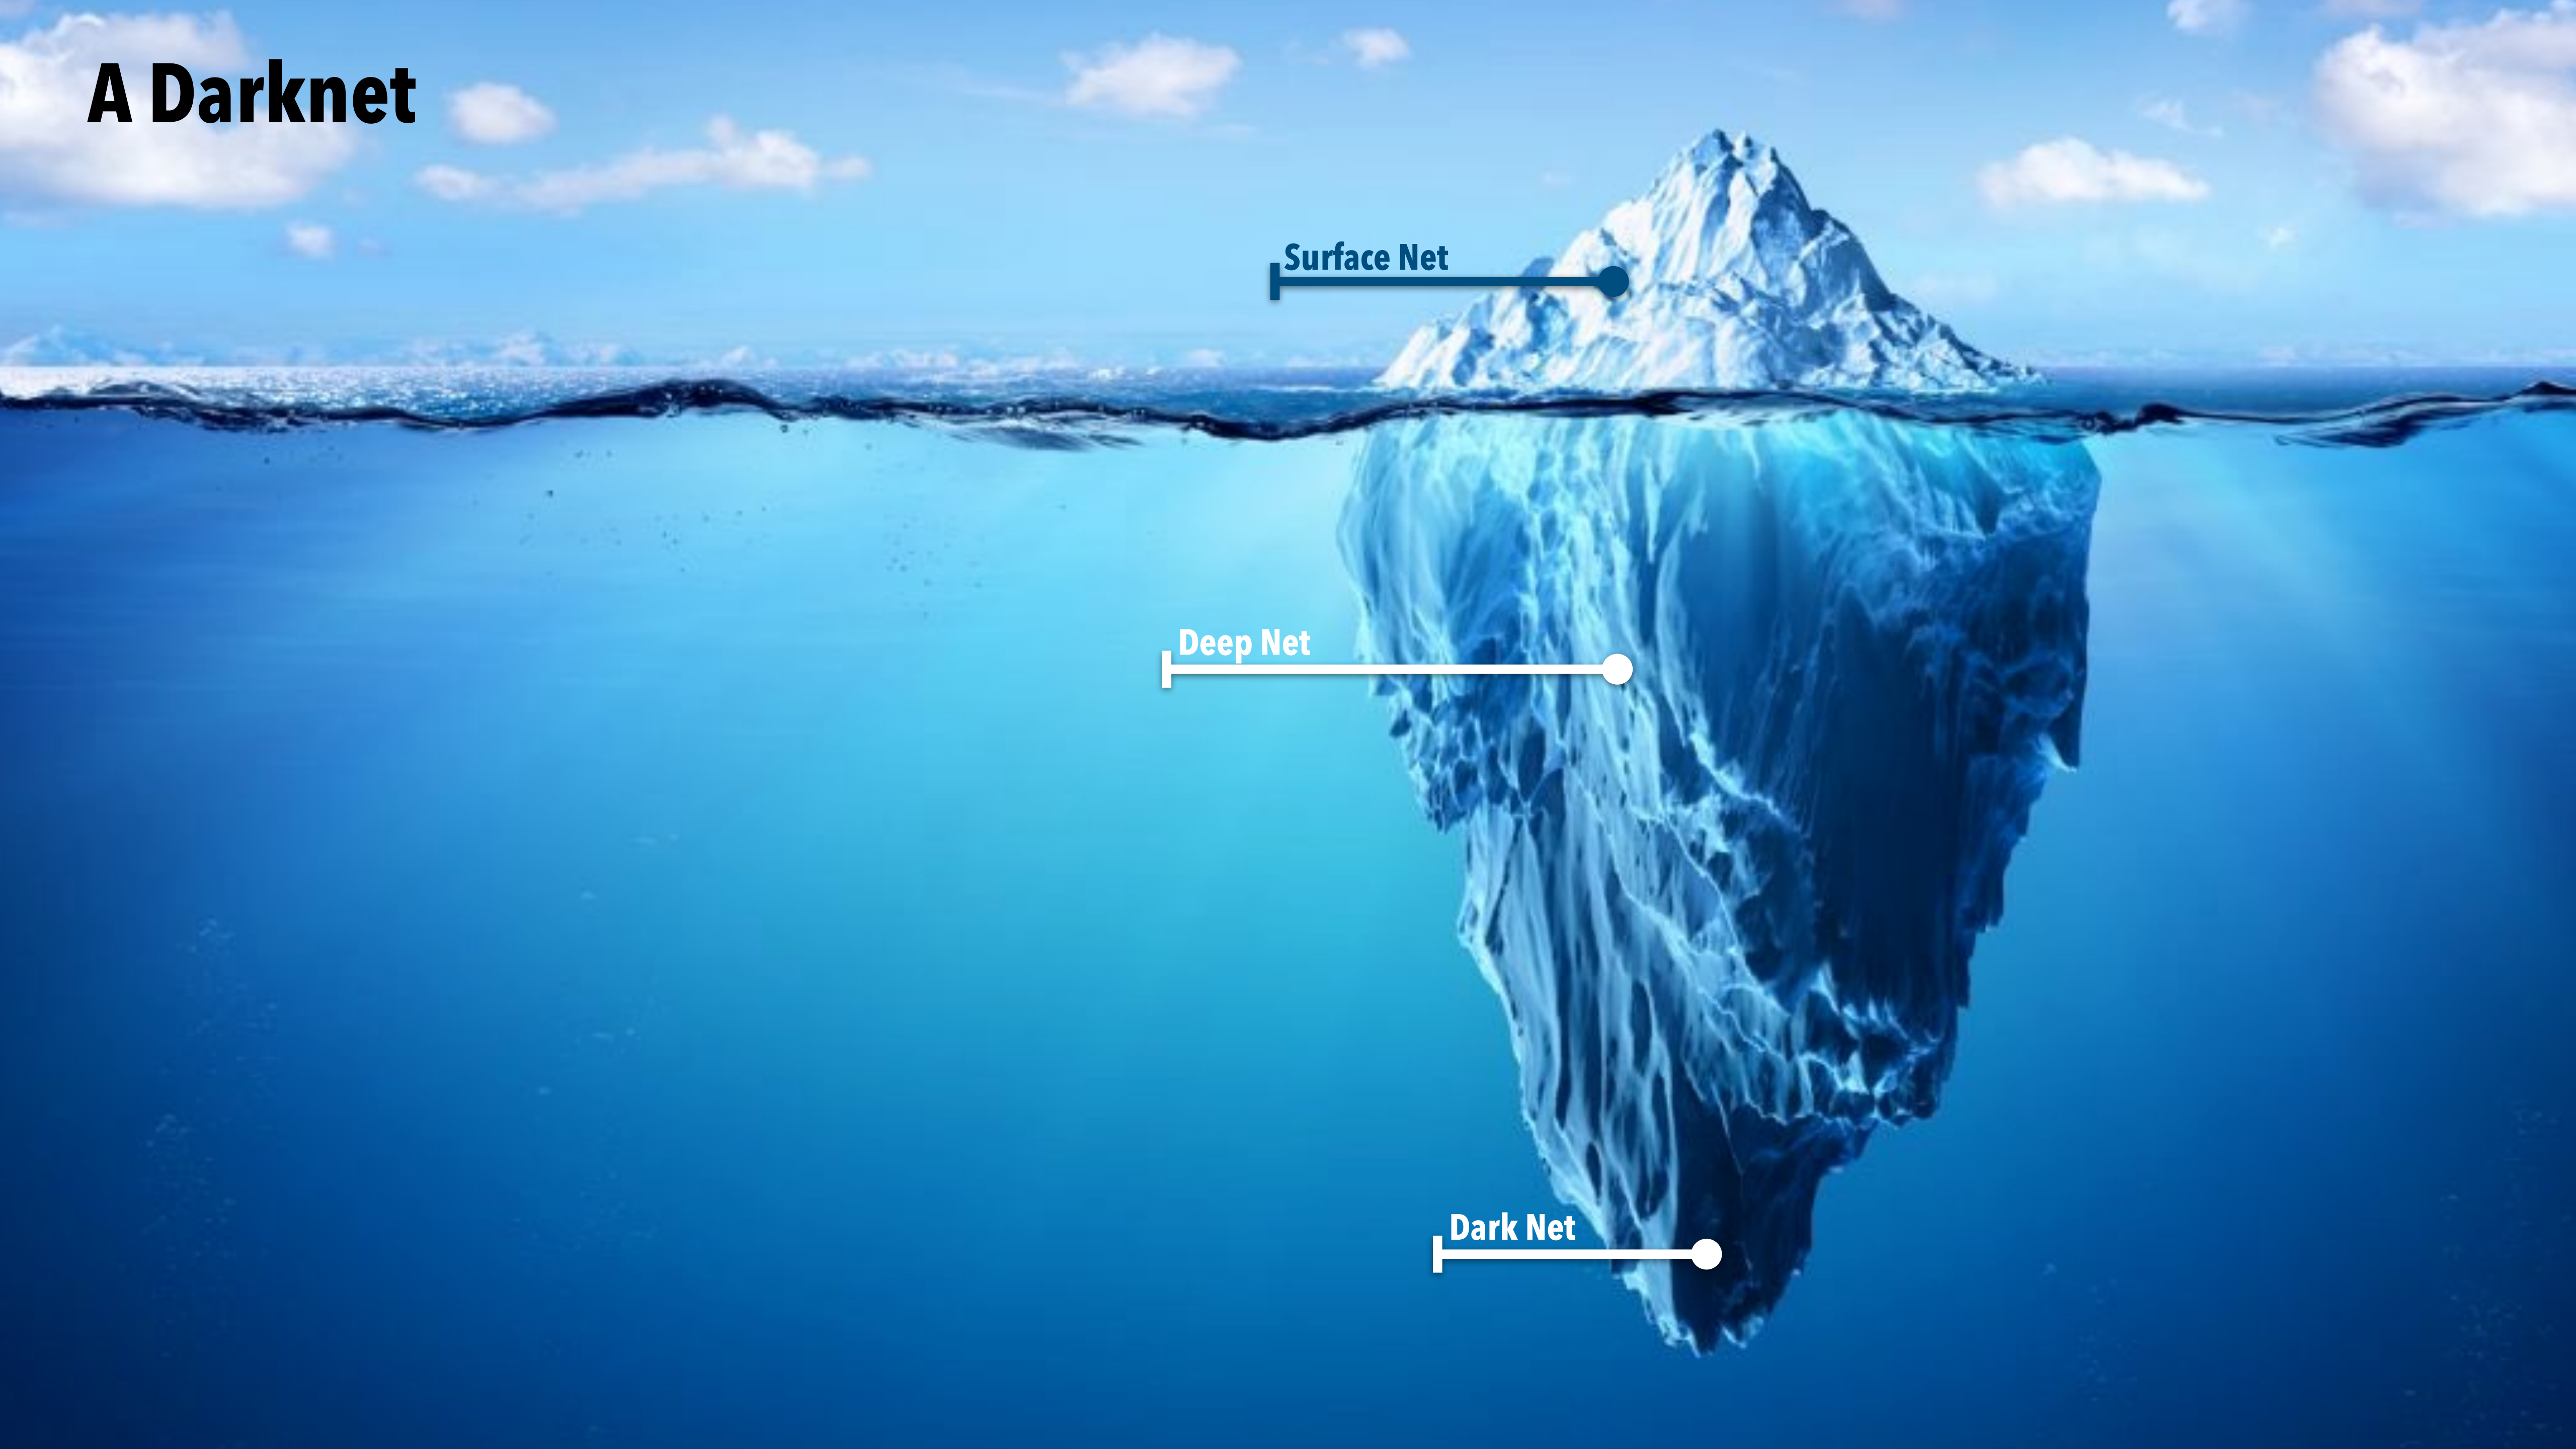

- Vaddisznók pusztítottak el közel 7 millió forint értékű kokaint egy olasz erdőben
- Indexnek nevezte el a rendőrség Bambi és Lövész kőlykeinek egyikét
- A Joker legőrültebb jeleneteit soha nem fogjuk látni

uploads/2016/07/pdf/  
Kill\_or\_Get\_Killed.pdf

80 KILL OR GET KILLED

for which there is no defense if the victim is taken by surprise. It is not unlikely that it will be used again, since many individuals, in all armies during World War II, received training in it, just as they received training in methods of strangulation.

In killing an enemy sentry, all factors regarding the approach and initial attack, described for use with a rear strangle, apply. The approach from the rear is naturally a noiseless one. At the time of rising, a few feet in the rear of the victim, the knife should be taken either from the sheath where it has been during the crawl, or from the teeth where it may have been carried. The attack is launched from a distance of

### KILLING AN ENEMY SENTRY

This is the best method of surprise knife attack taught in the Armed Forces. Approach from the rear, grasp the nose and mouth with the left hand to prevent outcry, and thrust the knife into the kidney area, as shown at the left. After a short interval, withdraw the knife and cut the throat.

### HINT

- You can use air from SCUBA cylinders.
- You can also use other fuels instead of propane, e.g. hydrogen, methane or acetylene.
- These fuels give better results, if security measures allow you to buy.

Tire Barometer

2. This tire barometer can measure up to 11 bars. We will use it in our procedure.

Regulator 2

3. The meter on the right measures a maximum of 25 atmospheres - almost equivalent to 25 bars, while the meter on the left measures a maximum of 2.5 atmospheres - almost equivalent to 2.5 bars.

Tire Barometer 2

4. This tire barometer can measure a maximum of 16 bars.

### CAR BOMB PREPARATION:

#### 1 - Mixing the Gases:

- Discharge gas from the Cooking Gas Cylinder until only 9 bars are left in it.
- Note: to be sure of the required amount, you have to measure the pressure after every few moment of releasing the gas. Use a barometer suitable for the cooking gas cylinder.
- Note: If you do not have the suitable barometer, there is a simple way to measure the pressure by a tire barometer (fig 1.1)
- Take a normal cooking gas regulator and cut its connecting nut off. Use a hacksaw to cut at the yellow mark. (fig 1.2)
- Take a tire's inner tube and cut the valve stem off, in such its lower part fits the nut. (fig 1.3)
- Fit the valve stem into the nut precisely.
- Apply epoxy from the outside to provide a strong adhesion between the valve stem and the nut and prevent the gas from leaking. Also apply a little of epoxy inside - Do not block the hole. Now the nut is ready to use with the tire barometer and the Cooking Gas Cylinder. (fig 1.4)

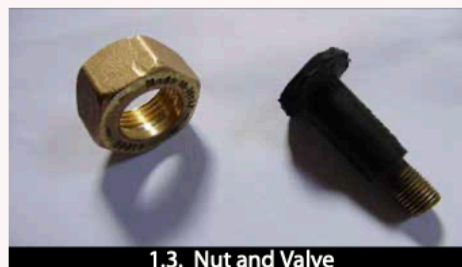

**?** DID YOU KNOW?  
that you can mix the two gases in the SCUBA Cylinder? An air cylinder can sustain more than 12 Cooking Gas Cylinders of 25-liters. BUT do not forget the balloon principle.

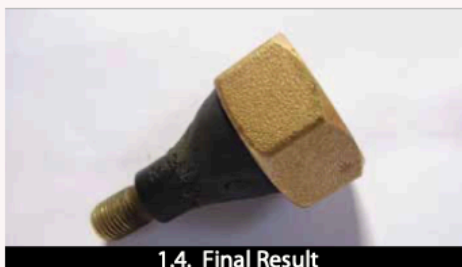

1.1. Tire Barometer

1.2. Cooking Gas Regulator

1.3. Nut and Valve

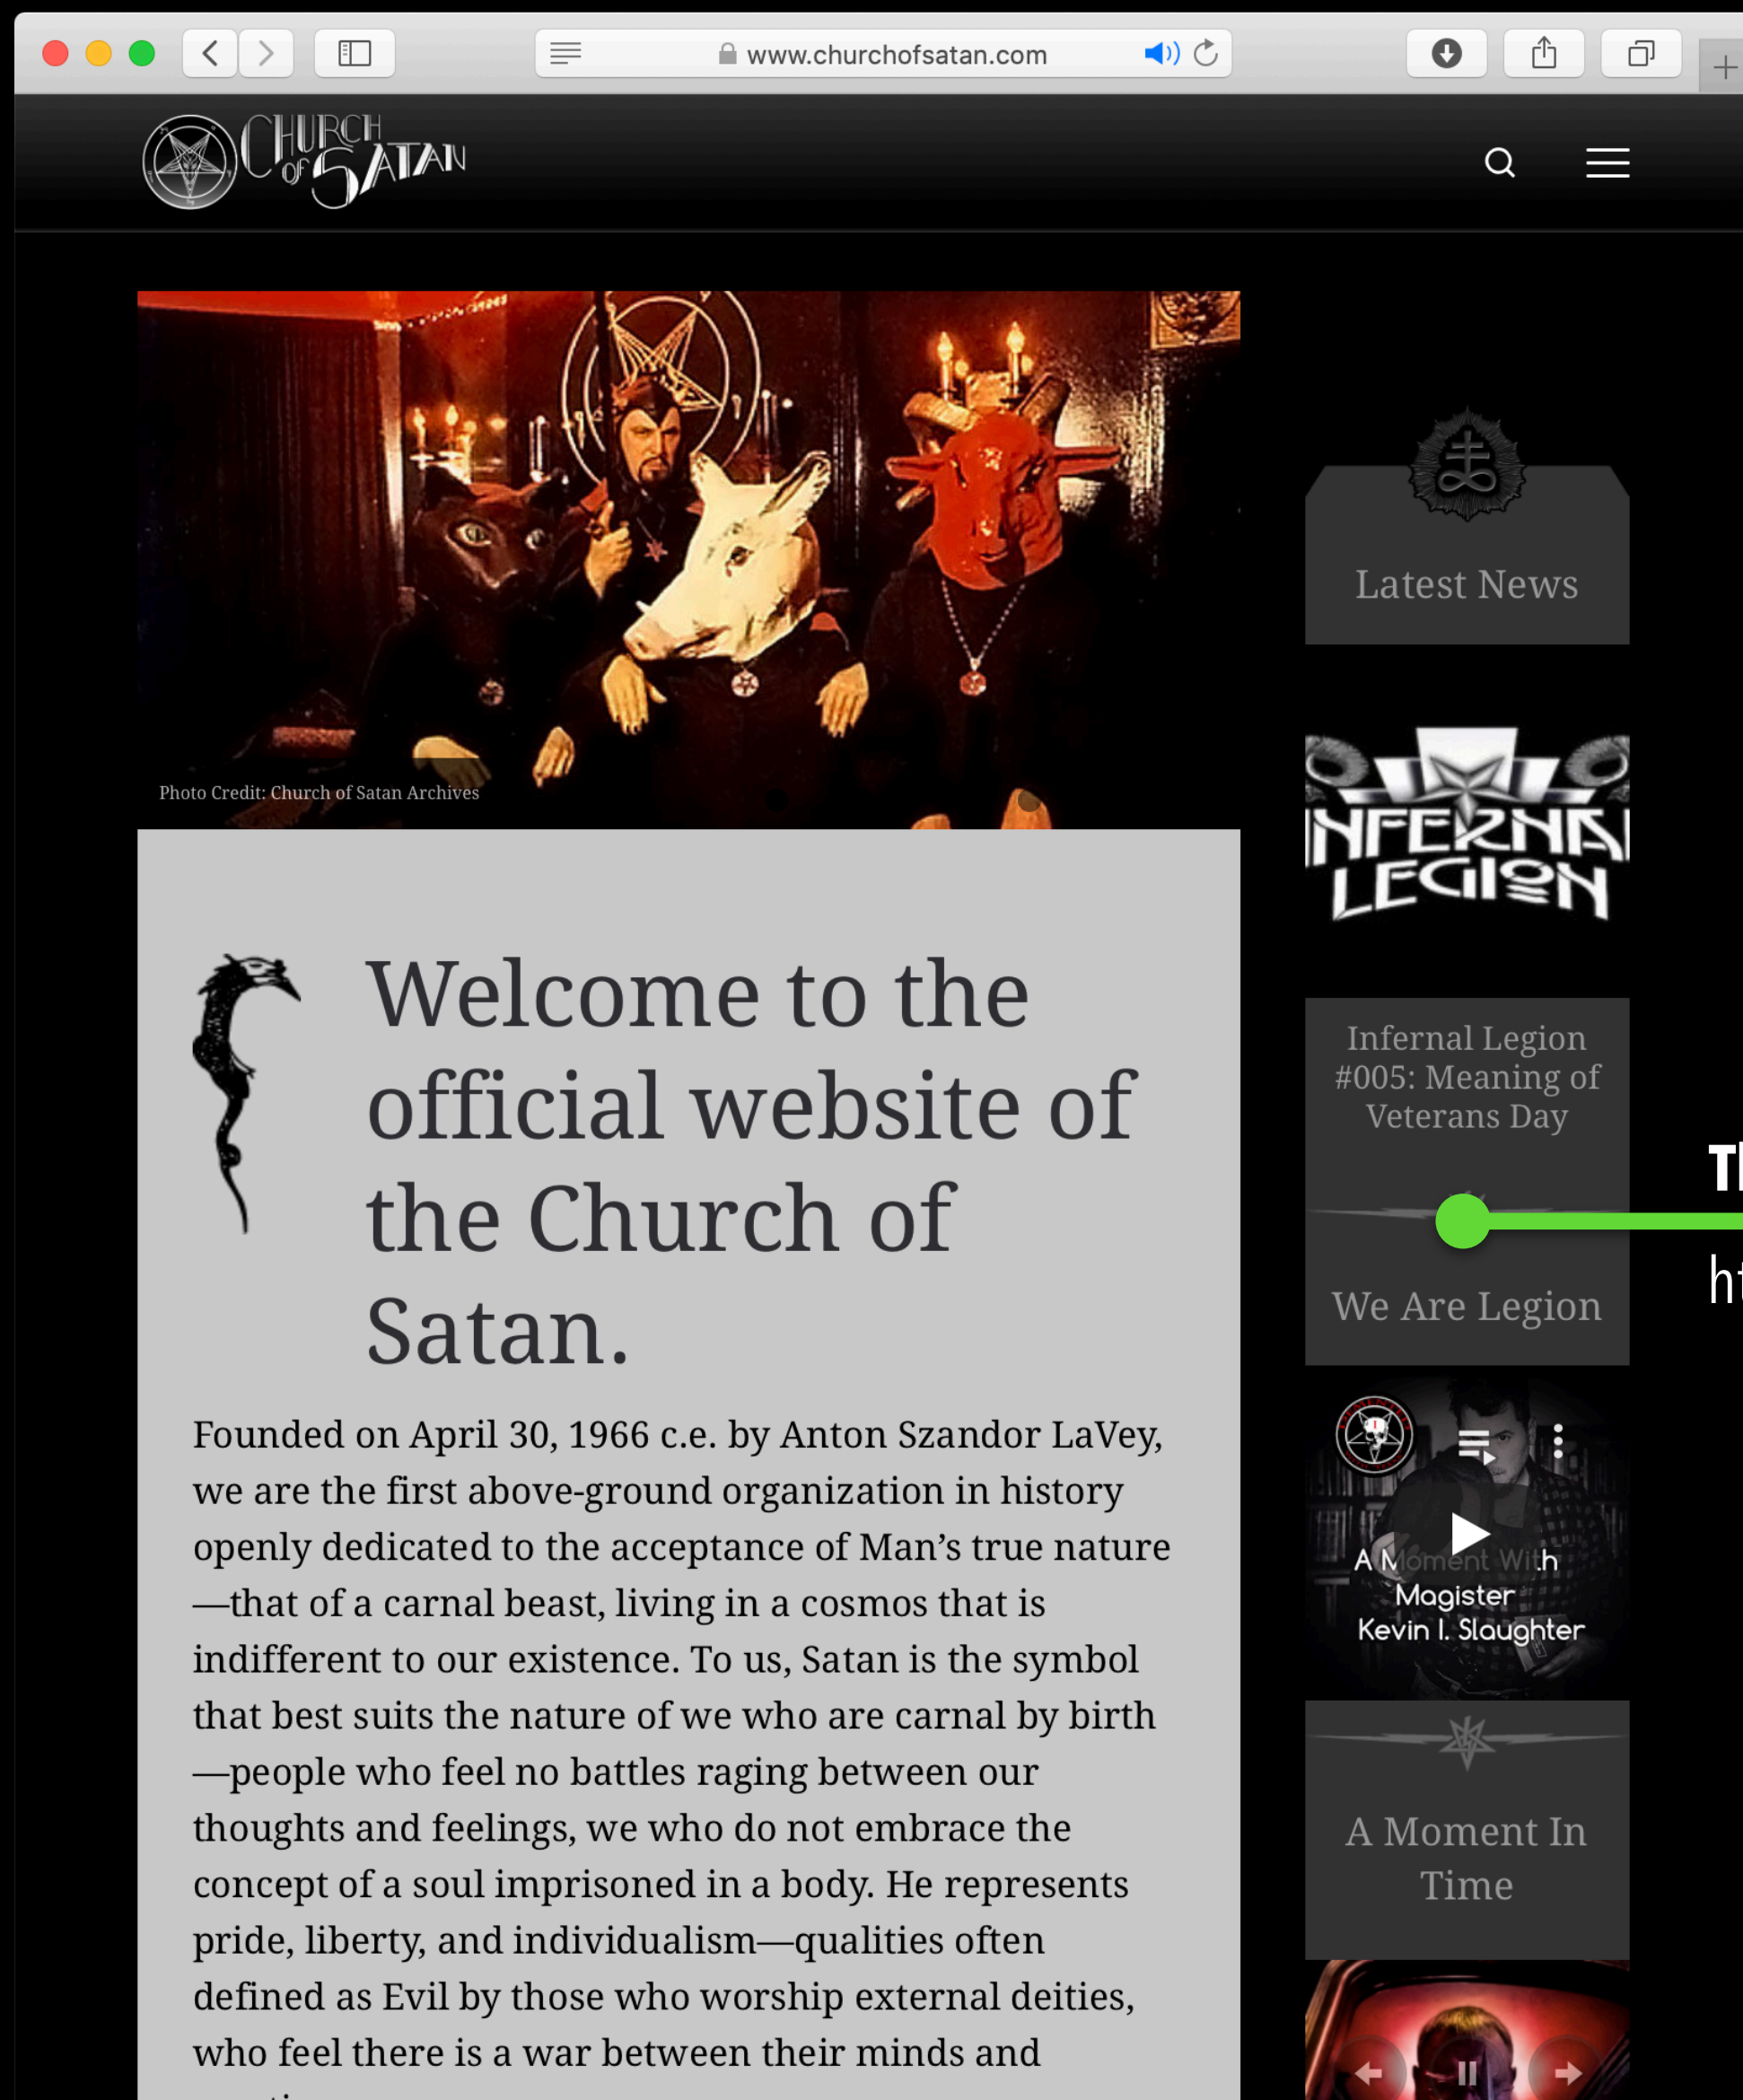

1.4. Final Result

**IT pro needed for venture backed bitcoin startup**

October 11, 2011, 08:06:22 PM

#1

Hello, sorry if there is another thread for this kind of post, but I couldn't find one. I'm looking for the best and brightest IT pro in the bitcoin community to be the lead developer in a venture backed bitcoin startup company. The ideal candidate would have at least several years of web application development experience, having built applications from the ground up. A solid understanding of oop and software architecture is a must. Experience in a start-up environment is a plus, or just being super hard working, self-motivated, and creative.

Compensation can be in the form of equity or a salary, or somewhere in-between.

If interested, please send your answers to the following questions to [rossulbricht at gmail dot com](mailto:rossulbricht@gmail.com)

- 1) What are your qualifications for this position?
- 2) What interests you about bitcoin?

From there, we can talk about things like compensation and references and I can answer your questions as well. Thanks in advance to any interested parties. If anyone knows another good place to recruit, I am all ears.

[rossulbricht@gmail.com](mailto:rossulbricht@gmail.com)

# Nemes célok

The screenshot shows the BBC News homepage. At the top, there is a navigation bar with the BBC logo and various menu items like News, Sport, Reel, Worklife, Travel, and More. A search bar is also present. Below the navigation, a welcome message says "Welcome to the BBC" with the date "Sunday, 17 November". There are three main article tiles: "England face Kosovo in Euro 2020 qualifier" (Football), "Prince Andrew stands by 'car-crash' interview" (UK), and "Latest updates from Brazilian Grand Prix" (Formula 1). At the bottom, there is a "More top stories" section with three articles: "What we did to bring War of the Worlds up to date", "Kaepernick does not attend NFL private workout", and "Five things you need to know before going freelance".

## Átlátszó

<http://ak2uqfavwgmjrvtu.onion/>

## BBC News

<https://www.bbcnewsv2vjtpsuy.onion/>

The screenshot shows the MagyarLeaks website submission page. At the top, there is a navigation bar with the MagyarLeaks logo and a search bar. Below the navigation, there is a "Congratulations!" message and a large red stamp that says "ATLATSZO.HU". To the right of the stamp, it says "Blow the whistle". Below this, there is a form for submitting a report. The form has a "Short title" field and a "Full description" field. The "Full description" field contains the text: "1942-ben ismertem meg Dániel Zoltánt. Egy ismerősöm, név szerint Galván Tivadar mutatott be neki, aki az autógyárban dolgozott. Akkor még nem sejtettem, hogy békaemberekkel fogok találkozni. Vagyis... Az később volt." At the bottom of the form, there is a "Files" section and an "Add file" button.

Download About Donate Docs Research Develop Blog Labs Language

## What does I2P do for you?

The I2P network provides strong privacy protections for communication over the Internet. Many activities that would risk your privacy on the public Internet can be conducted anonymously inside I2P.

**GET I2P 0.9.43**

### What is I2P?

I2P is an anonymous network built on top of the internet. It allows users to create and access content and build online communities on a network that is both distributed and dynamic. It is intended to protect communication and resist monitoring by third parties such as ISPs.

Aside from anonymizing traffic within the network, I2P functions with the same capabilities as the Internet, however its design and decentralization create a censorship resistant environment for the free-flow of information.

Mirrored sites hosted on the network allow access to news outlets and other resources in areas where information

## Panic! At The Disco

4.5M Listeners  
27 Albums

One of the biggest acts to emerge out of the emo movement of the mid-2000s, Panic! At the Disco transcended their early fame, transforming into a vehicle for singer Brendon Urie's charisma. [Read More](#)

# Engedjük

## **Forgalom**

A nyílt nethez képest nem számottevő.

## **Malware**

A forgalom növekedése jelezheti a fertőzött gépek számának növekedését.  
Nincs számottevő rdp forgalom.

## **Anonim böngészés**

Érdemes támogatni? Pro és kontra.

## **Mások példái**

Az én buborékomban általános az engedélyezés.

## **Tudjuk egyáltalán felügyelni?**

Sok alternatív megoldás van, az SSH tunnel, VPN szolgáltatók számos lehetőséget adnak.

## **Inkább legyen kontroll**

Érdemes engedélyezni és felügyelni, ezzel felkészülni egy esetleges esemény kezelésére.

# Tiltsuk

## **Bejövő forgalom**

A források jó eséllyel támadók.

## **Anonim böngészés**

Ezeket máshol végezzék, a munkakör ellátásához nem szükséges.  
\*Leaks oldalak ne legyenek elérhetők védett hálózatból.

## **Darknet szerverek**

Ezeket ne nálunk üzemeltessék.

Ne legyen értelme rejtett szervereket elhelyezni a hálózatban.

## **Felelősség**

Probléma esetén felmerül a felelősség kérdése.

## **Szabályzás**

2013 évi L. törvény, 41/2015 BM rendelet, Létfontosságú rendszerekre vonatkozó szabályzások.

# Lehetőségek

Méretezés folytatása és tökéletesítése

Alternatívák megismerése

Szabályzások

Ajánlás kidolgozása.

**Thank you!**

Koczka Ferenc
